

MOBEL LINEA

M U E B L E S O F I C I N A

COMPANY

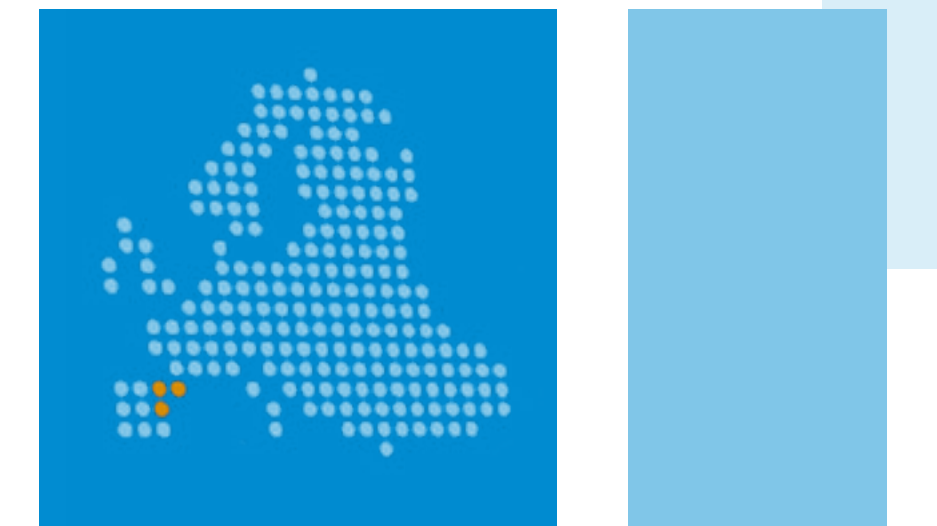

MOBEL LINEA S.L. is a Catalan family run Business founded in **1973**.

It is based in Cervera, a small town populated by 10,000 inhabitants, in the province of Lleida (Catalonia), a strategic point with a good traffic infrastructure.

Over time, MOBEL LINEA has become one of the **leading manufacturers in the industry**, and one of the largest in Europe. From its very foundation, there is a moderate but steady growth, which allows responding more efficiently to customer demands.

In MOBEL LINEA currently work **225** employees.

Nowadays export form **75%** of our total sales.

STEADY GROWTH

Due to growing market demand, both locally and internationally, MOBEL has witnessed, **gradually and steadily**, the expanding of its production facilities.

1977

1984

1999

2019

CONSTANTLY **EVOLVING**

In **1995** it is built a **new factory**, in the industrial area, with the purpose of separating the production of metal frames to the melamine and wooden panels which are located in the main factory.

In **2004** is remarkable the construction of **automated building** capable of storing all products produced by **MOBEL LINEA**. With 41 meters high and a capacity for **33.000 EUROPALETS** it turn out to be the highest in Spain at the time of its construction.

In **2011** the **metal factory is expanded** with the latest high technology in order to manufacture metal cabinets. Therefore it is incorporated a new and more efficiently painting tunnel which optimizes the energy consumption and respects the environment.

Nowadays there is available 2 manufacturing centers:

- **MOBEL I:** With a space of 45.000 m², devoted to the production of furniture and chairs.
- **MOBEL III:** With a space of 13.000 m², devoted to the production of metal components, frame and cabinets.

MANUFACTURING PROCESS

TECHNOLOGIES

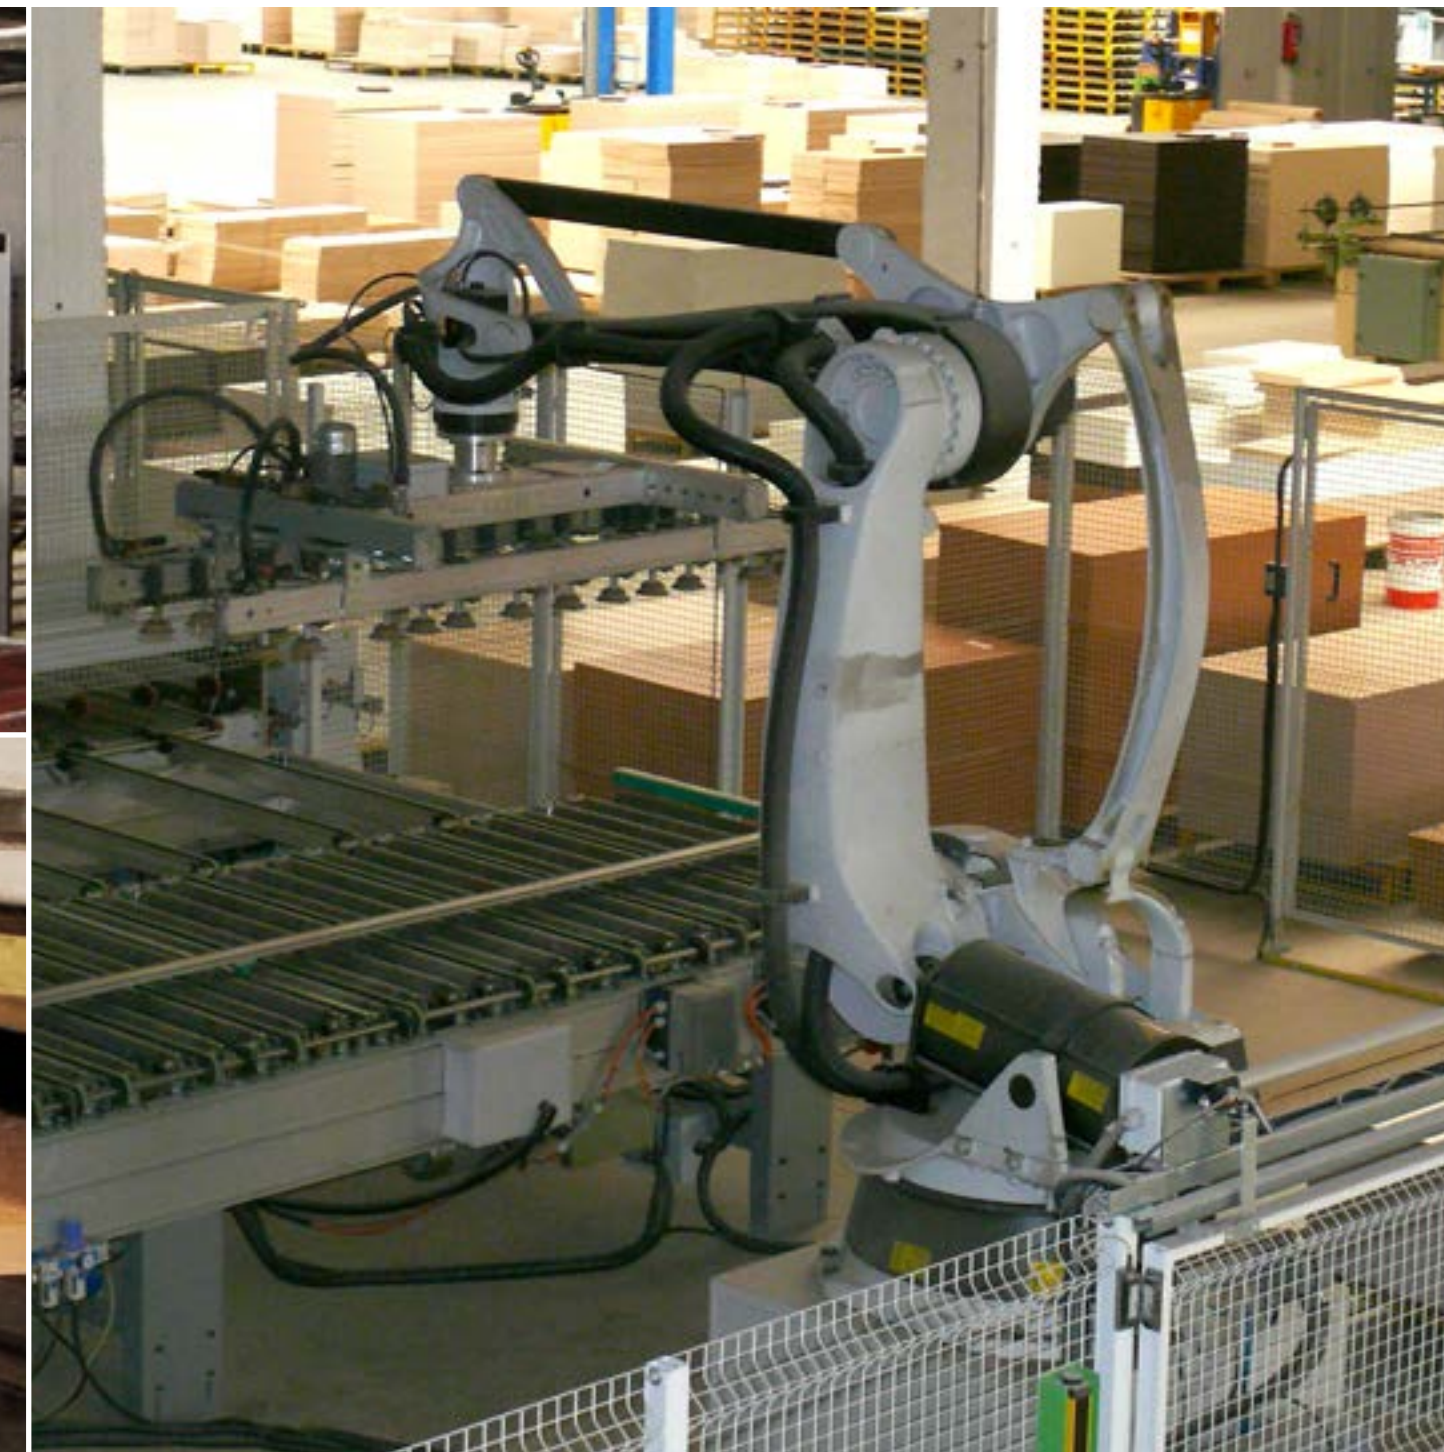

Technology is a decisive factor for the optimization of the resources during the manufacturing process. Our **investment policy** on manufacturing resources seeks the improvement and the efficiency of the same as well as the quality on all our products.

Latest Technology, a qualified team and well monitored manufacturing process help us become a reputed company on the **quality**, efficiency and environment.

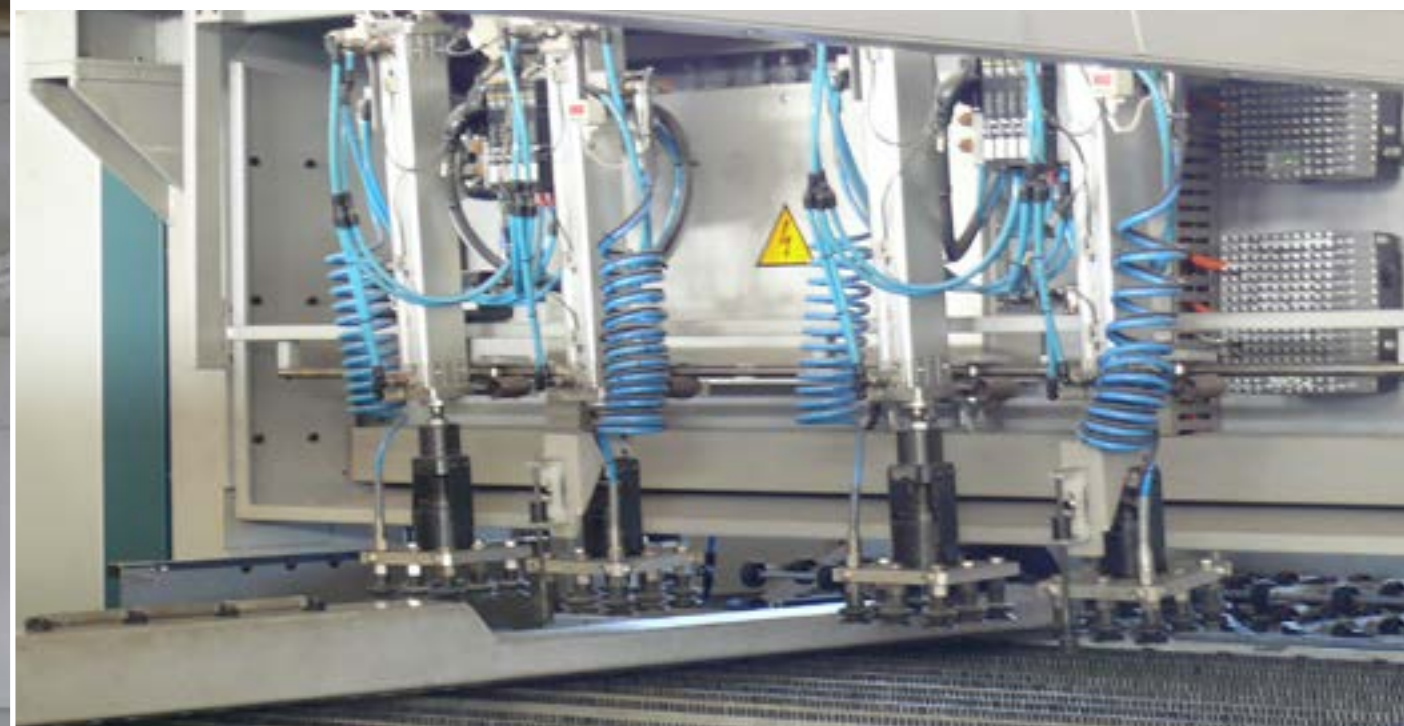

HI-TECH

Our productive resources are in constantly **evolution** incorporating the latest technologies.

HI-TECH

We are a highly competitive company in **quality**, efficiency and Environment even the factory painting area recently has incorporated a new and more efficient painting tunnel to preserve the environment.

UPDATED TECHNOLOGY

With our **automated warehouse** we achieve a complete traceability of all MOBEL LINEA products, having 41 meters high and a capacity to handle 33,000 pallets.

QUALITY STANDARDS

Quality and customer satisfaction are two of the fundamental approaches at **MOBEL LINEA**.

In 2001 MOBEL LINEA has been certified with the quality management standard **ISO 9001:2008** which guarantees that all processes are oriented to the quality assurance of products and service.

The use and the connection of **ISO 9001** with **ISO 14001** have allowed us to conduct an integrated monitoring system.

All products carry the **AIDIMA** quality seal (laboratory of the Technological Institute for furniture, wood, packaging and Similar).

Product Certificates

Management Systems

ENVIROMENT

MOBEL LINEA facilities and our manufacturing process are managed by a regulated environmental system certified in 2005 by the **ISO 14001:2004**.

In 2013 it was implemented the **ISO 14006:2011**. This norm allows us to perform the **ECODESIGN** environmental management system.

Chipboard is one of our raw materials with a smooth treatment for the melamine resin substances. **PEFC** certifies our commitment to the environment.

Management Systems

COMMITMENT TO THE

ENVIROMENT

MOBEL LINEA is a company committed to the environment where our activity involves the appliance and good practices of the environmental norms.

In 2006 it began the utilization of the centralized heating system which uses wood waste as the power source.

In 2007 it was implemented a photo-voltaic installation of **100 kW** placed on the roof of one our building facilities which generates 4,4% of electric energy we consume.

Also a few years back we decided to replace the garden watering system for xeric plants which use up very little water.

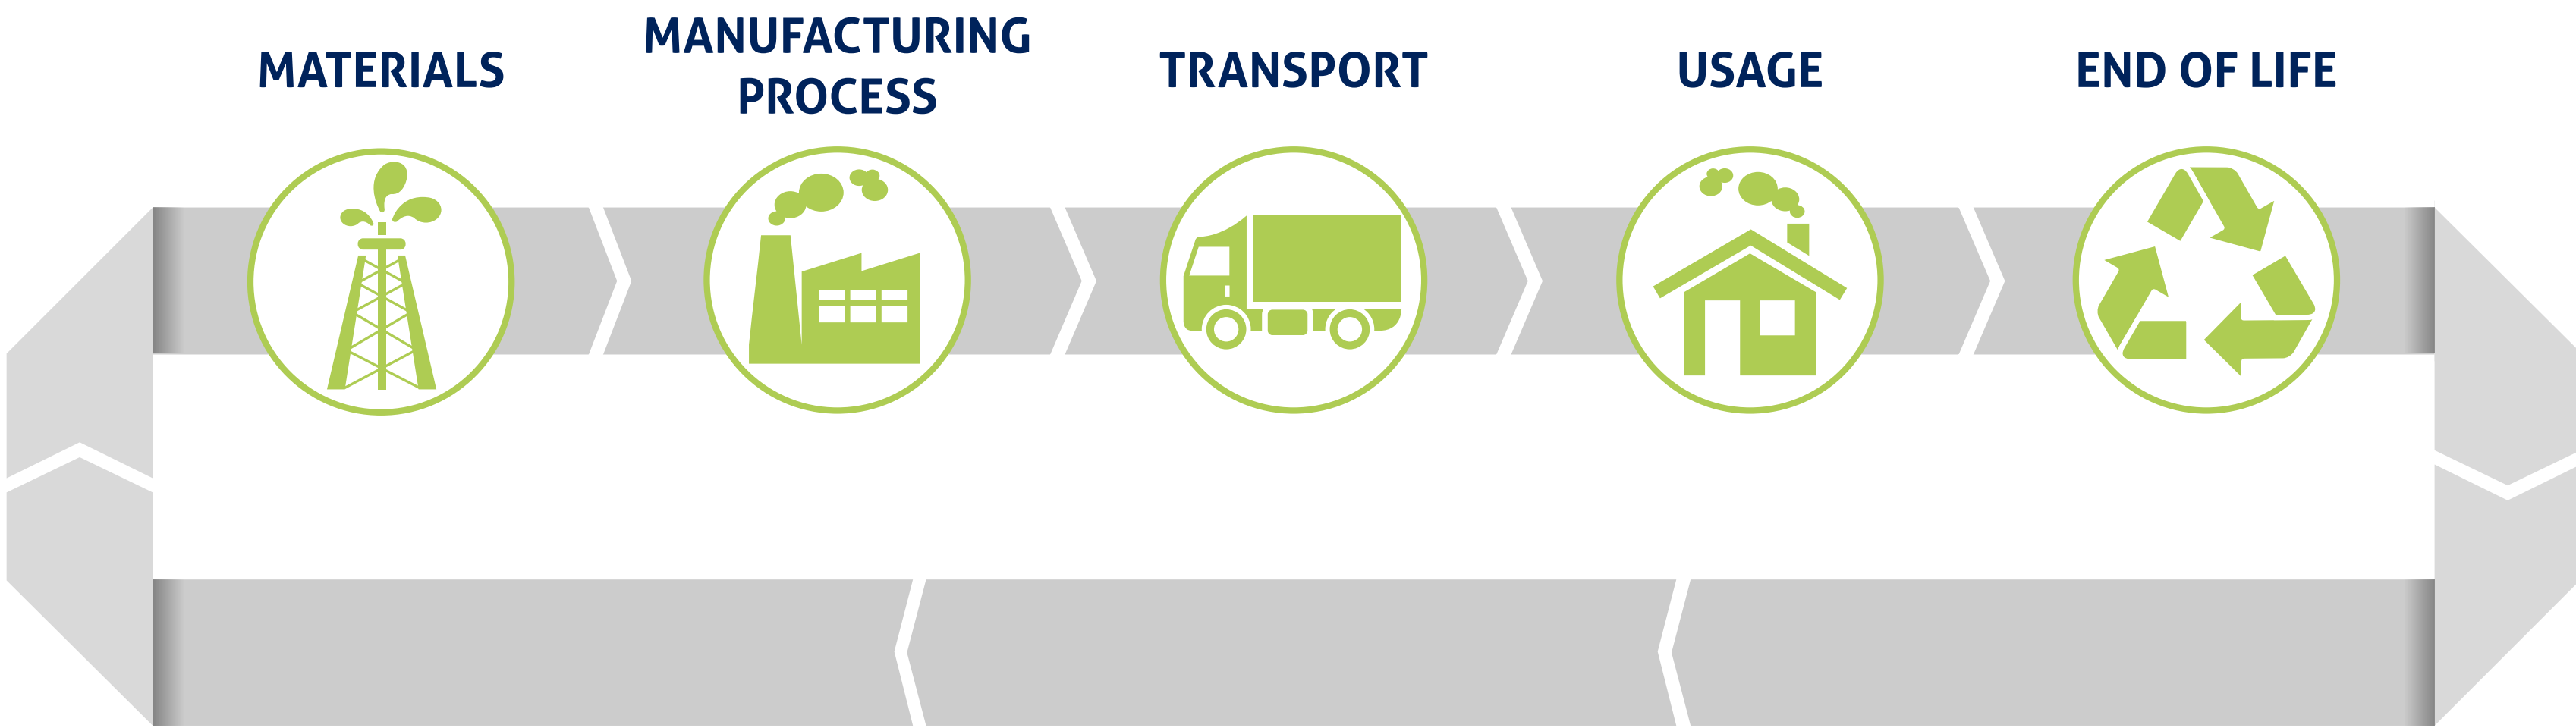

The concept and design of our products are associated with the **ECODESIGN** demands:

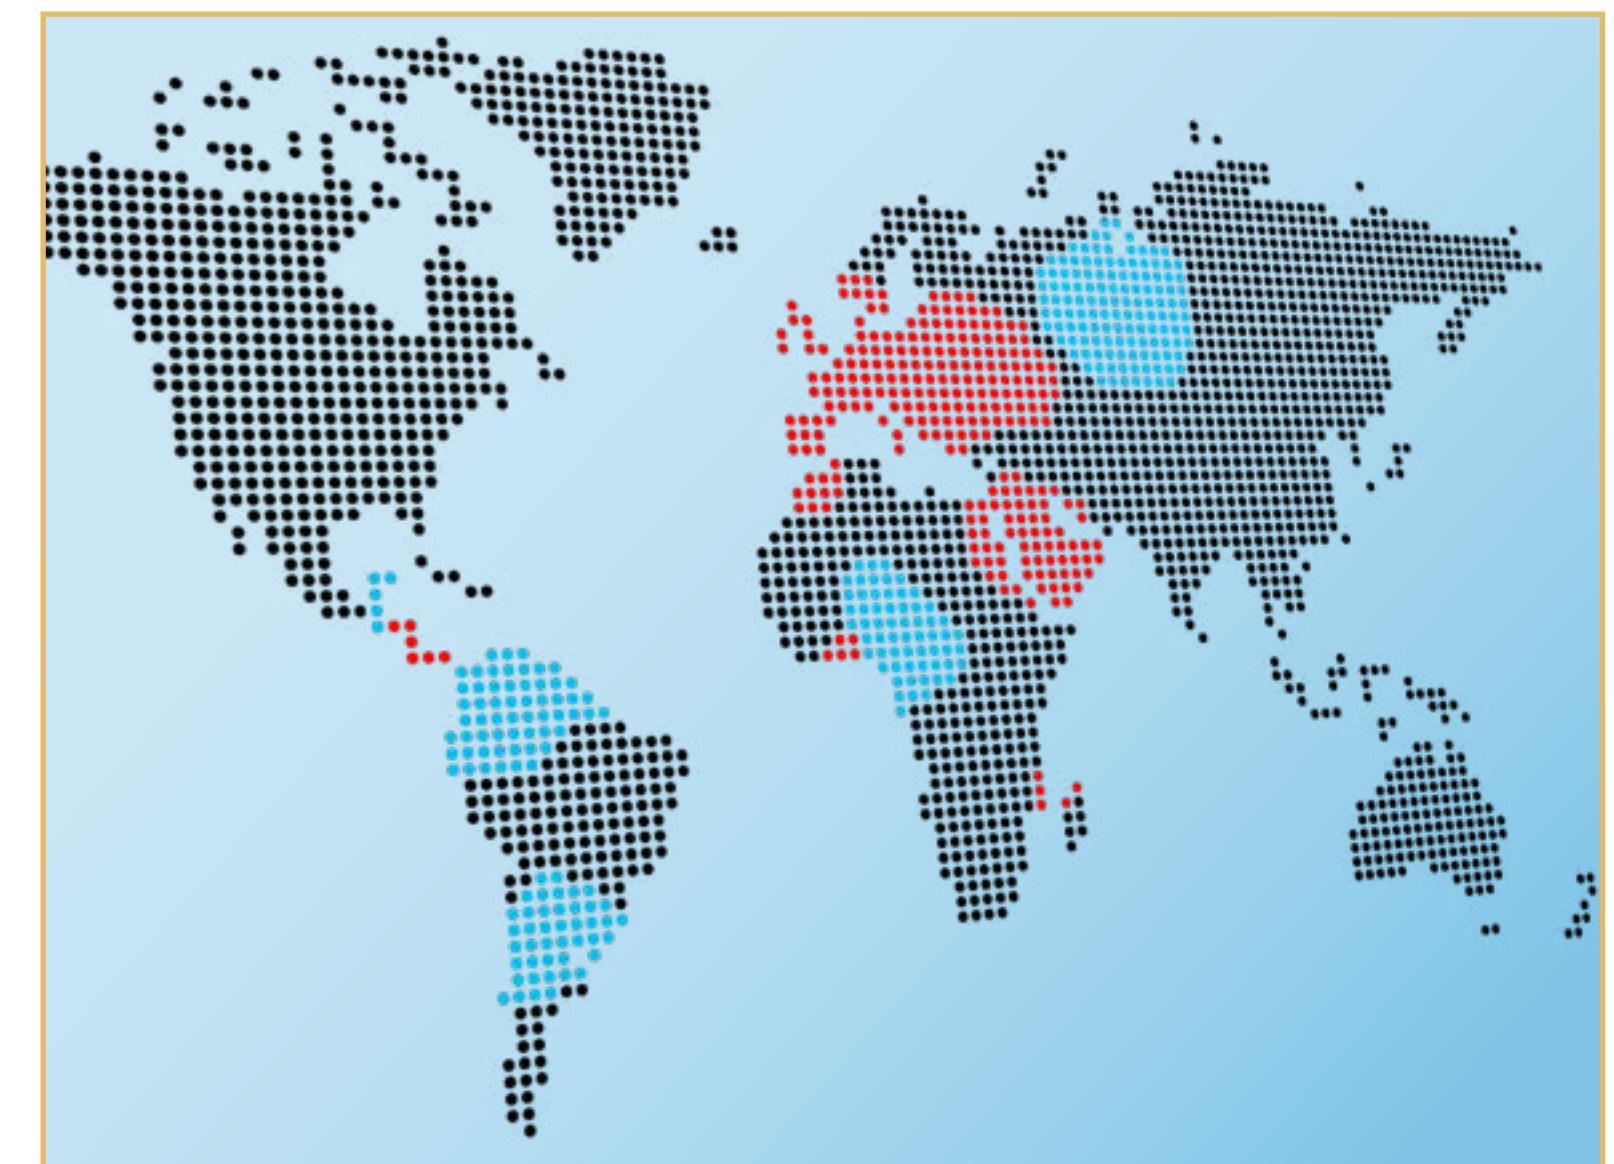

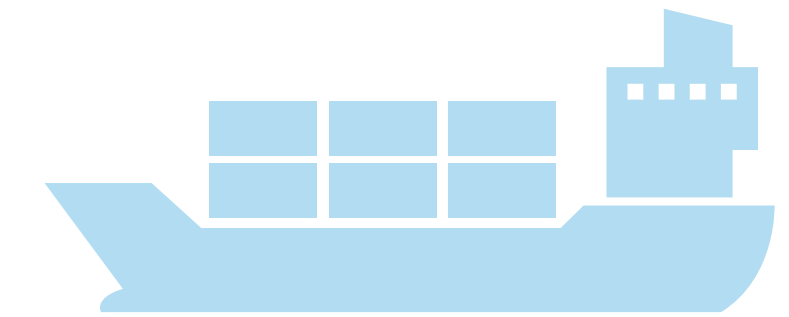

- Raw materials use.
- Environmental impact reduction for transport and the potential waste thanks to the optimization of packaging.
- Assure the least possible environmental impact when it is used.
- The recyclability of the components when it is no longer in use.

All products from **MOBEL LINEA** are subject to the development process of their **life cycle analysis**, In order to estimate the environmental impact of them over its life duration: from the raw materials extraction to its use and final reutilization our costumer is constantly informed.

SALES NETWORK

● States with MOBEL LINEA, S.L. Partners.

● Planned expansion of its global distribution network.

Mobel Linea exports mainly in Europe (**France, Germany, United Kingdom, Switzerland, Belgium, Bulgaria, Portugal, Greece, etc ...**) but also outside Europe (**United Arab Emirates, Réunion, Mayotte, Saudi Arabia, Qatar, Costa Rica, etc ...**).
